

Year: 1
 Term: Spring 1
 Topic: Mechanisms - Moving pictures

Where does this learning link to aspirations for the future?

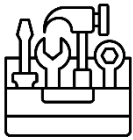

There are lots of children's books that are made with sliders so that parts move. These are made by publishers.

In DT, we follow this five step process.

Research

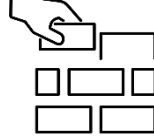

Skills

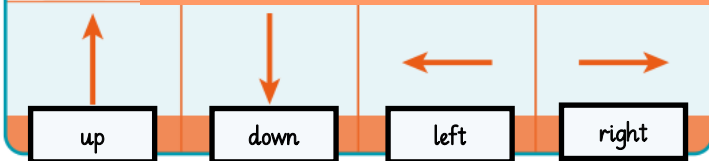

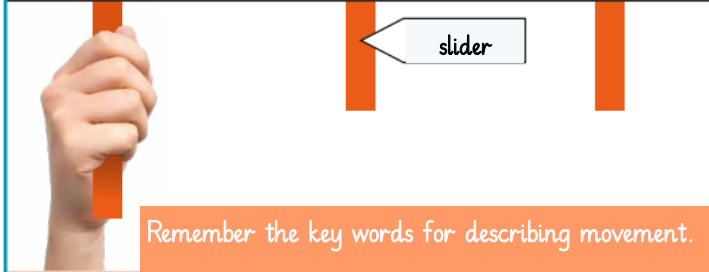

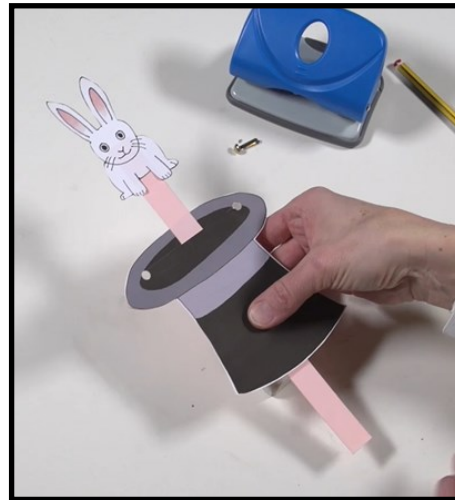

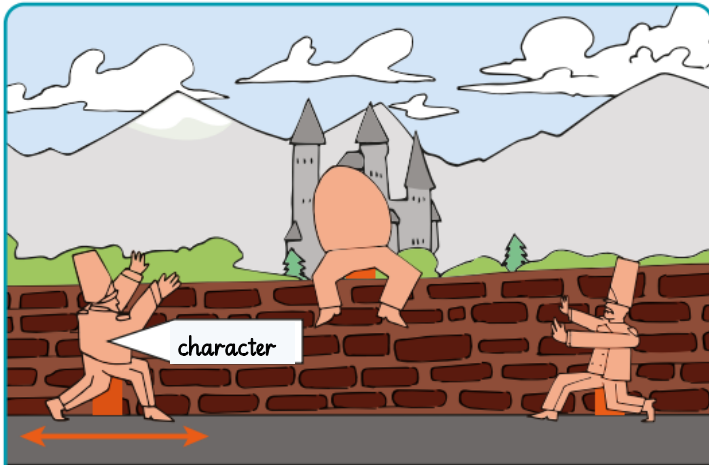

Design

Make

Evaluate

Glossary

- assemble** To fix all parts together.
- design** To make, draw or write plans for something.
- design criteria** A set of instructions for the project.
- evaluation** Looking at what is good and bad about something and thinking about how to make it better.
- mechanism** A set of parts of a machine that work together.
- model** A copy of a real object to show how it works or what it looks like.
- sliders** Something that can move from side to side or up and down.
- target audience** A person or particular group of people at whom a product is aimed.
- test** To find out whether something works as it should.
